TRUST BOARD
25th February 2010**Corporate Risk Register****Process**

All risks submitted for inclusion on the Corporate Register must have a completed Trust Risk Register Notification Form. In the first instance the Manager of the area where the risk has been identified is to discuss the risk with, the appropriate Lead Executive Director.

If, in the view of the Lead Executive Director, the Trust Risk Register Notification Form contains all relevant information, and is an appropriate entry for the Corporate Risk Register the risk will be entered onto the Corporate Risk Register.

On a monthly basis, at the Trust Executive Committee meetings, all new risks entered on the Corporate Risk Register will be highlighted and discussed. The Corporate Risk Register last went to the Trust Executive Committee meeting on 12th February 2010

New Risk added since the last Trust Board on the 28th January 2010

It was agreed at TEC on the 12th February 2010 that the compliance to assess all patients of the risk of developing venous thromboembolism (**VTE**) should be added to the Corporate Risk Register. Failure to meet the CQUIN target > 90% for all inpatients will lead to financial penalties.

| 907 | Service failure- Swine Flu Pandemic | The Swine Flu Pandemic may cause a high number of staff sickness and absence and a high number of patients (adult and paediatric) requiring hospital admission and intensive care consequently there is a risk of service failure. The key issues will be: (a) Service provision and performance targets (Business continuity) (b) Suboptimal patient care (c) Staff fatigue (d) Demand and capacity (e) Ethical considerations (f) Supply chain failure At risk: Service failure; Reputation; National targets; Statutory duty | 12 | HIGH | 16-Sep-2009 | 4-Mar-2010 | 1. Local areas to have Business Continuity Plans in place. 2. Main Pandemic Flu Plan supported by local area Flu plans. 3. Local ethical framework to be developed. 4. Escalation plans to meet the demand of Winter planning, bed remodelling and swine flu admissions. Dec 09: On going day to day management and adjustments to flu plan. Impact monitored daily, in house, as well as by the PCT/SHA. | Nov 09: Flu plans and the Trust's overall preparedness continue to be developed. The recent planning assumptions indicate a lower clinical attack rate and lower staff absence rate, but over a prolonged period ie Oct to May and not 15 weeks. Dec 09: Patient numbers have been below the expected level. It is still unknown as to how the disease will develop. Remains high risk due to this and winter pressures. | 6 | MED | Executive Director: Valerie Howell Lead Manager: Valerie Howell Contact: Valerie Howell from Jan 10 |
