

Your baby's data are important!

The **National Neonatal Research Database** is supported by Bliss the premature and sick baby charity, the British Association of Perinatal Medicine and neonatal units across the country

Neonatal unit staff record data into your baby's Electronic Patient Record

With the approval of the UK Health Research Authority, data are sent securely to the Neonatal Data Analysis Unit at Imperial College London to form the National Neonatal Research Database, and used subject to regulatory approval for multiple purposes to improve care

Improve health services

Improve health care

Develop health policy

Neither you nor your baby are identified in any outputs but if you do not wish to include your baby's data in the National Neonatal Research Database, you can use the national opt-out here: www.nhs.uk/your-nhs-data-mattershere (England) or by informing a member of the neonatal unit staff (Wales, Scotland and Isle of Man)

Develop new treatments

Please contact us at ndau@imperial.ac.uk if you have any questions or would like to get involved; we are very glad to have several parents on our advisory groups and steering board
